

Deployment Services

The Faster Route to Improving Customer Satisfaction

You provide your customers with outstanding technology. And the sooner you can get your technology up and running, the more satisfied your customers will be. With Shyft Global Services, that process is fast, easy and frustration-free. Our deployment experts implement, migrate and install your technology so that your customers can experience all its benefits from day one. From basic “rack and stack” setups to advanced deployments and rollouts, Shyft delivers the quality of service that delights your customers and enhances your reputation.

Deployment Services to Free Up Your Resources

When your most valuable resources are busy with deployments, they’re not able to focus on the larger goals of your enterprise. Shyft solves the problem, either as an extension of your team or as the delivery arm for your channel. Whether the assignment is a large-scale technology deployment or a transition to the cloud, our certified engineers design solutions that work quickly and cost-effectively.

Proven Expertise for the Benefits You Deserve

Our engineers offer your business a combined total of more than 2,500 certifications. With every project, their logistic and technological expertise makes it easy to:

- Mitigate the risks and costs associated with the implementation of new technology
- Decrease or eliminate fixed costs by allowing you to scale up or down according to your needs
- Gain access to off-payroll resources and pay only for the services you use
- Reduce customer downtime during deployments and transitions
- Avoid hardware issues and other obstacles that can delay delivery and increase labor costs

Manage Deployments Flawlessly From End to End

Our end-to-end deployment capabilities have you covered for implementation, installation and migration.
