IT Asset Disposition

Solutions that are compliant, secure and valuable

Managing IT assets can be a challenge, especially when hardware is nearing its end of life. Tech Data believes reverse logistics are just as important as your forward logistics—the entire product lifecycle matters.

Our global footprint of end-to-end support services works in your favor to create a compliant disposal process, maximizing value recapture, market valuation and asset tracking—all with an agile and flexible infrastructure. We will dispose of the IT assets while maintaining compliance, security and value, so you can focus on the road ahead.

Complete end-to-end chain of disposal procedures

Tech Data provides you with a comprehensive disposal service that involves secure facilities, compliant procedures and responsible engineers providing real-time reporting and full visibility, maximizing the product life value properly. We'll help you determine the best outcome for your aging assets—whether that's extending the life of or sunsetting the IT equipment.

Account management

Get ITAD solutions tailored to your needs provided by our account management team. Our customer-centric operations deliver complete visibility into all equipment and sales results, as well as a single point of contact for scheduling, tracking and reporting on nationwide activities.

Data erasure & security

We secure all sensitive data on the equipment and ensure that it will be completely removed from the assets before they're destroyed, remaining in compliance with all local, state and federal laws. Tech Data is certified by both R2 and the Recycling Industry Operating Standard (RIOS) and is ISO 9001 QMS and ISO 14001 certified.

Global Lifecycle Management

Repair services

Reduce the amount of parts to manufacture and the amount of equipment in circulation at end of life. Our certified technicians provide comprehensive repair and refurbishment services for the full spectrum of IT products—down to the component level.

Remarketing

Recover the highest value from your used assets through resell, refurbish, trade-in or redeployment and reinvest the funds into your budget and balance costs.

E-cycling

Our core environmental protection policy calls for zero landfill, zero incineration and zero export of non-functioning assets or e-waste.

Inventory management & reporting

Have your assets tracked, monitored and documented during each step of the inventory process. Tech Data provides a comprehensive disposal program and provides you a certification of data of destruction and/or recycling.

On-site services

From de-installation to packing and shipping, including inventory, we provide on-site professional services at offices and data center locations nationwide.

ITAD managed in the right way

Take the processes of inventory, discarding, refurbishment, resell, repair, and management of equipment to the next level. By identifying and understanding your needs, Tech Data reduces complexity and manages your longstanding equipment with minimal or no disruption of workflow, leading you to reach and maintain the outcomes you deserve.
